

FABULOUS FILTRATION

Name: _____ Class: _____

Activity

Instructions: Draw some of the ways you use water every day, in the boxes below:

We all need water to survive.

Unfortunately, lots of the water we use is getting polluted!

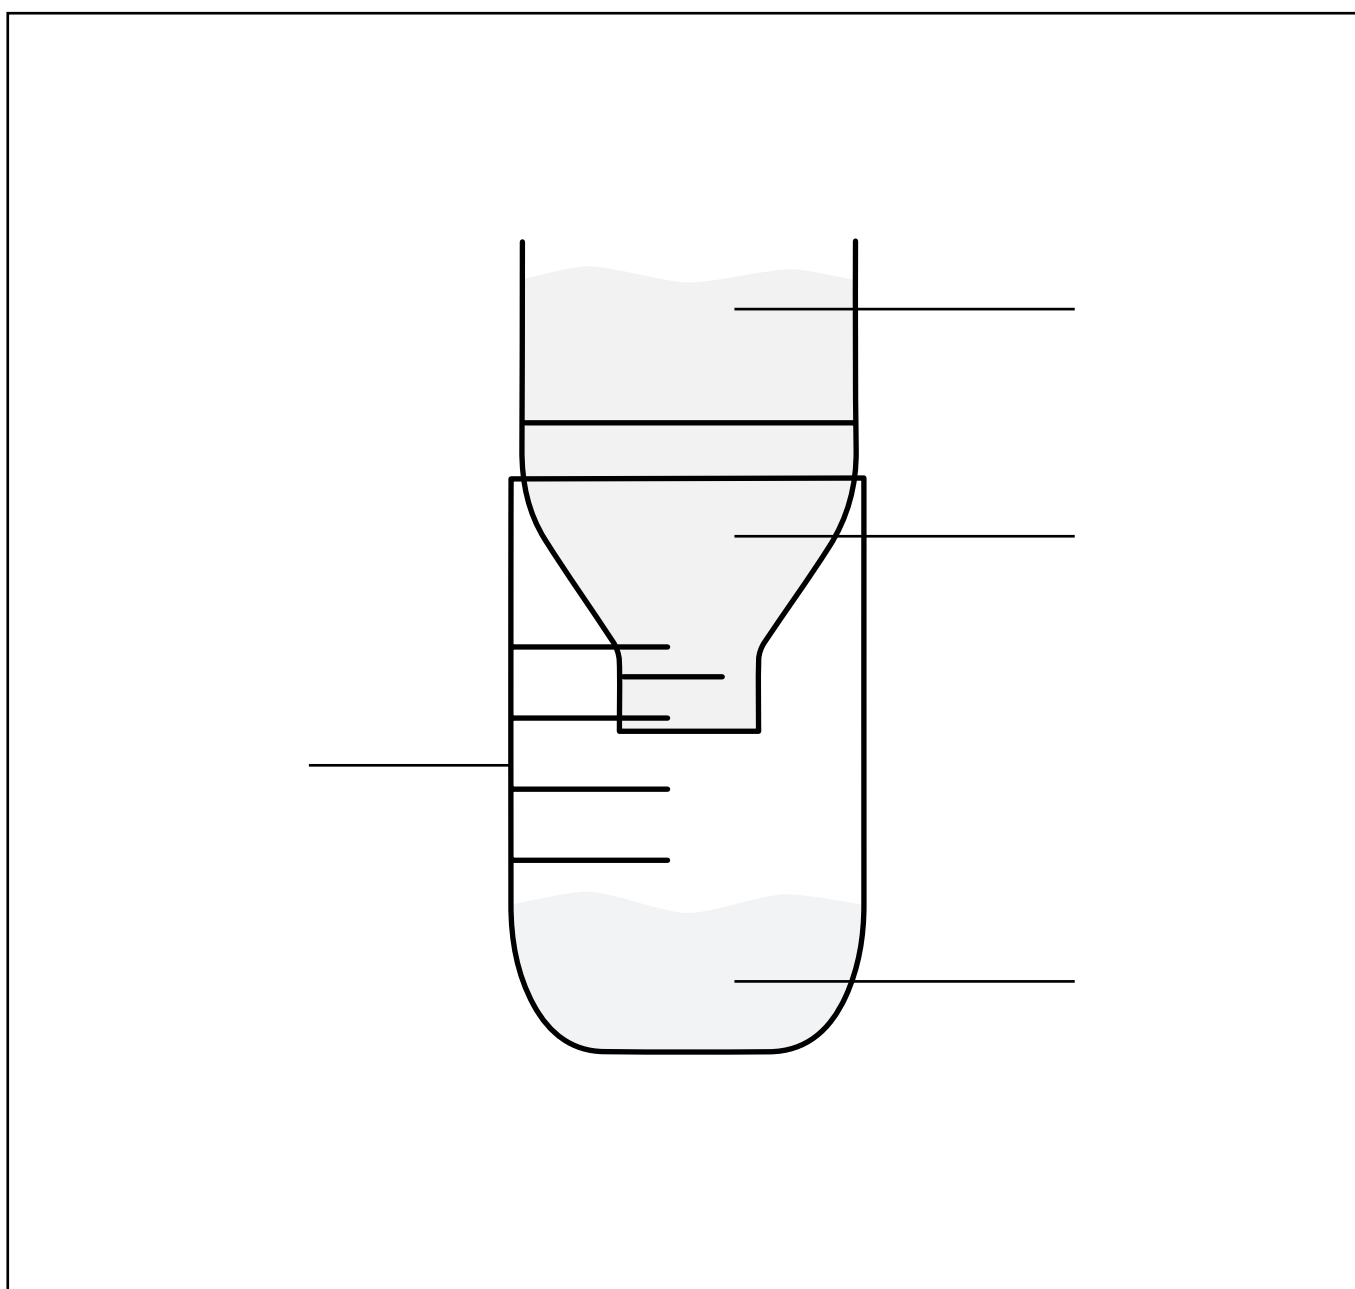

What do you think pollution means?

How can you make water clean?

We can make a **filter** to clean some of the pollution out of water. Your teacher has made a home-made filter.

Colour in and label the filter using the labels below:

filtered water, polluted water, filtering material, bottle filter

Draw a picture of the water **before** it goes in the filter.

Draw a picture of the water **after** it goes through the filter.

Did the filter help clean your water?

Would you drink this water? Why/Why not?
